

My adopted sister, Karen, is an angel on on this earth. Her daughter provides her story below. There is no one more loving, more grateful or more deserving than Karen. 100% of donations help pay for caregivers to stay with her (\$50/night) and turn her so she does not develop sores which previously left her unable to get out of bed and sit up in her wheelchair for nearly a year. All help is so greatly appreciated.

Karen Henderson

My mom, Karen Henderson has Multiple Sclerosis. She requires the help of nurses and caregivers in order to continue living in her own home. We are so thankful that we have been blessed with financial help from family members, but that money has run out. We are in desperate need of additional funds in order to continue paying her caregivers. If we run out of money to pay caregivers completely, then my mom's only option is to go to a nursing home instead of private care in her home. We would love to be able to let her continue living her same lifestyle and be close to family and friends. Living in a nursing home would be detrimental to her emotional health.

If you would be willing to donate any amount, large or small, every penny will help pay for providing her care and keep her in her home longer. Thank you all so much for your support and for caring enough about my mom to make a donation.

The donations received are dispersed as they come in. The amount raised in the fund thus far have already been used. We have to put a goal due to the way this site is set up. Caregivers get paid immediately. And they do a wonderful job, I must say.

Thank you all,  
Sierra Nething
